

Conversational AI

AI POWERED CHAT

WHAT IS AI?

Artificial Intelligence (AI) is a technology that gives a computer the ability to learn and make decisions that **resemble human intelligence**. It is now mainstream, used in many areas, and when it is combined with a powerful chat interface, it allows a business to have a **meaningful conversation** with its customers.

THE PROBLEM

You are investing time and resources on establishing a conversation over your **Website, Whatsapp, Facebook or LinkedIn**.

However you want **skilled staff investing their valuable energies** talking to clients who are most likely to bring business in eventually.

AI POWERED CHAT

An AI powered chat will enable you to **move gently the conversation to a human** after being pre-filtered by a robot in a natural way.

Placing the technology **at each point of entry** for your customers like your website, social pages, helpline chat or technical support, you can **significantly reduce time and cost** in processing new queries.

OUR OFFER

Depending on the functionalities included, as a guideline a **Conversational AI** will start from:

Setup: £20,000+vat to configure

Monthly: £2,000/m+vat to maintain
