

A small business needs a robust phone service to connect to others and grow.

DO YOU USE YOUR MOBILE?

You started the business with your mobile, but then

- when your clients ring back **they call your mobile**, not your office, hence you get lots of calls
- sales people use their mobiles too and **your clients become theirs**
- you cannot transfer calls, record them, or find that **verbal agreement** you really need now

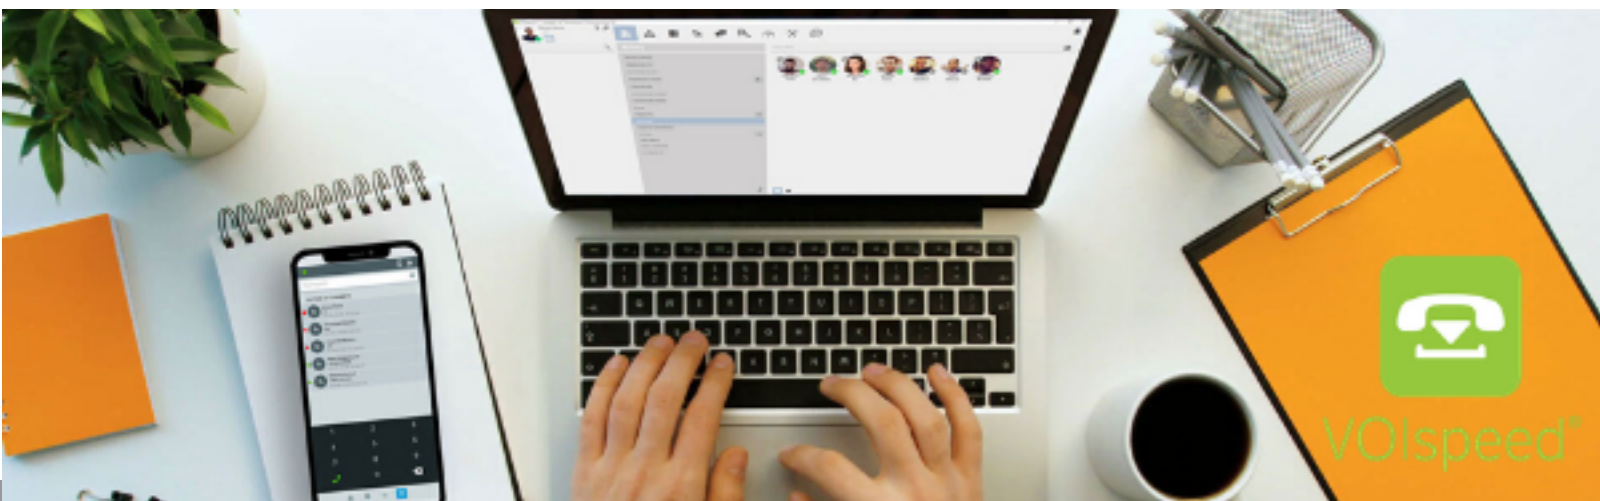

YOU NEED A PHONE SYSTEM

...but which one, there are so many in the market?

You came to the conclusion that to grow your business you need a phone system but there are some pitfalls you want to avoid:

- talking to someone who **doesn't know your business** and **does not resolve** your problems quickly enough
- dealing with a supplier with **no engineers**: are your phones the same as your light switches?
- a phone on your desk using **old technology** that is not growing with you

WITH VOISPEED YOU CAN:

- use your mobile or desk-phone to make and receive calls **with your office number**
- **record all conversations**, see who is calling you and what number people have called
- a software that **is updated regularly**: conference, team chat, transfer to mobile and much more

OUR OFFERING

only **£19.99/m+vat per user**, including

- **software** for your PC
- a desk **phone** for each user
- a new **phone number** and free **UK calls**
- an **App** for your mobile
- all the benefits of the **cloud**: safe failover in a UK data centre, security, scalability and flexibility
- all **technical support** done by UK graduate engineers (...not a call centre!)

Term: 24 months
